The US Army Environmental Center (USAEC) is a leader in the Army's efforts to balance environmental stewardship with the commitment to train and equip soldiers to fight and win the nation's wars. The Center provides environmental program management and technical support products in support of Army training, operations, acquisition, and sound stewardship.

PEOPLE

USAEC is comprised of about 400 professionals who bring world-class expertise and innovative solutions to environmental stewardship challenges. Col. Tony R. Francis commands the Center. His staff includes military environmental experts and Army civilian employees who are teamed with professionals from environmental services firms, university programs, and liaisons from other government agencies such as the US Geological Survey, the US Forest Service, the US Fish and Wildlife Service, and the Advisory Council on Historic Preservation.

LOCATIONS

Headquartered on the Edgewood Area of Aberdeen Proving Ground, Md., USAEC also operates regional environmental offices at Aberdeen Proving Ground, Md.; Atlanta, Ga.; Kansas City, Mo.; and Denver, Colo. These regional environmental offices help the Army and the Department of Defense coordinate and communicate with federal and state officials to resolve regional environmental challenges. The Center also manages the Impact Area Ground Water Program at Camp Edwards, Mass.

FOCUS AREAS

- Environmental cleanup
- Sustainable installations and ranges
- Support to weapons systems acquisition
- Regulatory review, monitoring and analysis
- Technology transfer
- Environmental program reporting and data management
- Outreach to stakeholders
